Making Functionality Fashionable

Beautiful, functional and technologically advanced, Caple appliances are central to the concept of a contemporary kitchen. From super sleek induction hobs to discretely effective cooker hoods, whisper quiet dishwashers and smart [in every sense] wine cabinets, they cater for every lifestyle.

Chef, entertainer, home maker? Whatever your passion Caple provides the inspiration to carry it off with exceptional style. Our range offers the depth and versatility to seamlessly integrate into your kitchen, whatever its design or layout. Discover exciting new ways to cook, cool or wash, but above all, bring out the beating heart of your home.

COOKING THE WAY YOU WANT

Our oven range features the following functions, to make cooking as easy as pie.

DEFROST / TURBO DEFROST

- Fan only no elements
- No heat, fan only
- Uses fan power at room temperature to cut defrosting time in half

PERFECT FOR
Frozen desserts

FULL GRILL

- Full width grill
- Even and consistent grilling

PERFECT FOR
Large pieces of steak or fish

TURBO GRILL

- Fan assisted full grill
- Quick browning

PERFECT FOR
Cooking meat whilst keeping all the juices

TURBO GRILL PLUS FAN HEAT

- Fan assisted top element
- Heat from both rear and upper elements

PERFECT FOR
Finishing off a cooked dish, or melt a cheese topping without the worry of overcooking

ECO GRILL

- Half width grill
- Energy saving inner grill section only

PERFECT FOR
Small portions of food, such as bacon or toast

TURBO ECO GRILL

- Fan assisted half grill
- Even and quick browning

PERFECT FOR
Potato gratin or lasagne

TOP HEAT

- Top element only
- Gentle heat to brown the top of a dish

PERFECT FOR
Pasta or potato dishes

BASE HEAT

- Bottom element only
- Re-heating cooked food or for keeping food warm

PERFECT FOR
All food types

TURBO BASE HEAT

- Fan assisted bottom element
- Designed for delicate and slow cooking

PERFECT FOR
Crispy pizza bases, or eliminating the need for blind baking

CONVENTIONAL HEAT

- Top and bottom elements
- Cooking consistently through to the middle
- Best results, use one shelf only

PERFECT FOR
Baking

TURBO CONVENTIONAL HEAT

- Fan assisted top and bottom elements
- Fast and even heat distribution
- Ideal for cooking more than one food type without transferring smells or tastes

PERFECT FOR
Light and delicate baking, such as pastry or bread

FAN HEAT

- Fan element
- Fast and highly efficient

PERFECT FOR
Juicy roasts, no pre-heat required – crisp the outside and keep the inside soft

ROTISSERIE

- Turns meat automatically as it cooks, so that it bastes itself

PERFECT FOR
Succulent roasting and even browning

GAS COOKING

Uses the Euro burner
- Retains moisture in joints of meat

PERFECT FOR
Roast beef and
crispy potatoes

GAS GRILL

Full width grill
- Even and quick browning

PERFECT FOR
Lamb cutlets or
pork chops

STEAM

Steam Injection
- No transfer of flavours
- Retains moisture and locks in nutrients
- One of the healthiest cooking methods

PERFECT FOR
Cooking multiple food
types on one tray

FAN HEAT WITH STEAM

Fan element and steam injection
- Fan element with added steam
- Even heat distribution with the added benefit of the steam injecting moisture into the cavity

PERFECT FOR
Retaining the moisture
in meat

- Even heat distribution
- No flavour transfers across dishes

PERFECT FOR
Multi-level cooking

PYROLYTIC SELF-CLEANING

Works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash for easy cleaning.

PERFECT FOR
Taking the effort out of cleaning

BOOST

Rapidly heat your oven to the required temperature using all elements at full power. Ideal for when you're in a rush.

PERFECT FOR
When cooking time is less than 20 minutes

DESCALE

Take the hassle out of descaling your steam oven. Simply pour in the descaler to the water tank, select this function and let the machine do the rest. This is recommended every three months

PERFECT FOR
Prolonging the life of your steam oven.

MICROWAVE

Standard microwave cooking function.

PERFECT FOR
Ideal for reheating
leftovers

MICROWAVE & TURBO GRILL

Uses microwave, fan and grill for quick browning. Ideal for cooking meat and keeping all the juices.

PERFECT FOR
Cooking a whole
chicken

MICROWAVE & FAN HEAT

Reduce cooking times with the addition of fan heat for even cooking.

PERFECT FOR
Fluffy jacket potatoes
with a crispy skin in a
quarter of the time

MICROWAVE & CONVENTIONAL HEAT

Uses microwave with top and bottom elements.

PERFECT FOR
Speeding up baking
times for bread
and cakes

AUTO SETTINGS

A range of automatic settings for milk, soup, vegetables, noodles, bread, fish, meat & chicken

PERFECT FOR
Making soup from
scratch

Ovens

There's a Caple oven for every kind of kitchen and every type of lifestyle. Choose from our sleek and elegant SENSE range or our exceptionally versatile Classic family.

COOKING

12

13

OVENS

SINGLE OVENS

With handy features like telescopic runners and soft close hinges, our built-in single ovens are big on looks and highly practical. The perfect solution when space is at a premium.

Look out for products marked with Sense or Classic flags to easily identify the range.

S C

SENSE OVENS

With a choice of sultry black glass and an elegant stainless steel trim or a subtle contemporary gunmetal exterior, SENSE appliances have been designed to fit together effortlessly and will turn heads in any kitchen. At the same time, smart thinking and intelligent solutions deliver the ultimate in easy functionality.

Featuring innovative touch control technology, every SENSE oven delivers outstanding results, whatever the cooking task.

MotionHeat+

MotionHeat+ technology utilises specially designed vents and fan heat to evenly distribute hot air around the oven cavity. It reaches the desired temperature rapidly with no need to preheat, saving time & energy. Perfect for multi-level cooking without the transfer of flavours, achieving even results every time.

TELESCOPIC RUNNERS

As standard, all SENSE ovens come with two full extension telescopic runners making it easier to check food as it cooks and reducing the risk of burning yourself on the oven interior.

ROTISSERIE

The C2901, C2105 and C2105GM single ovens feature a rotisserie rack, perfect for cooking succulent roasts.

S Look out for products marked with Sense flags to easily identify the range.

SOFT CLOSE

The C2105 and C2105GM feature a intuitive soft-close hinge which activates when the door is inches away from the closed position preventing it from shutting abruptly.

PYROLYTIC OVENS P

The C2401 and C2401GM Pyrolytic technology works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash. It saves you vast amounts of elbow grease, and can in-fact improve oven efficiency over time.

PRECISION CONTROL AT YOUR FINGERTIPS

Our SENSE range features fully-programmable touch controls for precise and accurate cooking temperatures and times. Although, if you prefer the tactile feel of fixed dials, opt for the C2362 with solid metal controls.

CLASSIC OVENS

Our high-performance Classic range comes with a host of standard and optional features, designed to make cooking even more satisfying.

These ovens are classically designed, as the name suggests, in stainless steel and sheer black glass. You'll find touch control programmable electronic timers, cool-touch doors plus a pyrolytic self-cleaning model.

PERFECT HARMONY

The new Classic range has been designed to seamlessly fit together to create a premium look. Whether you prefer a clean linear design or a practical stacked style, each model works perfectly together (see pg 56-57)

LARGE VIEWING WINDOW WITH A LARGE CAPACITY TO MATCH

For more efficient cooking you can keep an eye on exactly what you're cooking without having to open the door and lose heat. Some single ovens also have a capacity as large as 67 litres, perfect for a hungriest of households.

TOUCH CONTROL PROGRAMMABLE ELECTRONIC TIMERS & SOLID METAL DIALS

You can preset cooking start and stop times with ease of use and precise control at your fingertips.

MotionHeat+ technology utilises specially designed vents and fan heat to evenly distribute hot air around the oven cavity. It reaches the desired temperature rapidly with no need to preheat, saving time & energy.

Perfect for multi-level cooking without the transfer of flavours achieving even results every time.

C Look out for products marked with Classic flags to easily identify the range.

FUNCTIONS

Steam Ovens

Better taste and better for you.

Steam cooking is healthy, fuss-free and ensures fresh food retains its natural colours, flavours and shape. What’s more, all the natural nutrients and goodness end up on the plate and not in the pan.

Oh, and it is also one of the most energy-efficient ways to cook food.

COMBINATION STEAM COOKING

Steam cooking is especially well suited to cooking foods like seafood, bread, vegetables, pasta and rice - the sky's the limit.

Utilising the combined functions of a steam oven - fan, steam, and grill - you can be sure to beautifully capture flavour at every turn. From delicate fish and perfectly baked bread to cooking succulent joints of meat with fan and steam to lock in moisture, combination cooking has never been so easy.

TOUCH CONTROLS AND LCD DISPLAY

The intuitive full touch control panel lets you swiftly access all functions, as well as the programmable electronic timer and electronic clock. You can also view the current cooking time and the actual temperature in the cavity.

DELICIOUS DESSERTS

Combining fan heat [dry heat] with steam [moisture] is the optimum environment for making perfect light pastry or cakes.

ODOURLESS COOKING

There are no food odours with steam. This means you can prepare different parts of a meal together, without the flavours mingling. You can save energy too by cooking your meat and vegetables together.

LARGE VIEWING WINDOW

From the display panel select the light function to check what is cooking without steam escaping the cavity.

Microwaves

Caple microwaves are packed with clever technology, and perfect for making quick and easy snacks as well as serious cooking. A must-have for a busy lifestyle.

DELICIOUS MEALS IN MINUTES

Minimalist design to complement any kitchen, yet big on handy features.

Depending on your cooking requirements, you can choose a microwave for its traditional uses such as warming up leftovers or defrosting food quickly. Alternatively, why not opt for a combination microwave? As well as cooking meals quickly, you can also use it as a normal oven and grill providing extra space when you are entertaining.

TURNTABLE FREE DESIGN

Caple microwaves have been exquisitely designed to look the part. Some models have 40L capacity, removable dishwasher friendly glass base and a turntable free design. This means you can fit large dishes into the cavity.

SENSE MICROWAVES

If you are in need of a traditional microwave to heat up your leftovers, the CM108 is the perfect choice. Or, if you're feeling more adventurous in the kitchen, try the CM110 combination microwave with a range of cooking options to enjoy. The CM110 is available in Black or Gunmetal.

CLASSIC MICROWAVES

Want to create a seamless built in look? The Classic range allows you to neatly arrange the bank of appliances in a linear or stacked formation so you can match your oven and microwave perfectly.

SENSE BUILT-IN
COMBINATION MICROWAVES

CM110

CM110GM

Features

GREAT RESULTS

Achieve great results by combining the fan or grill together, or just regular convection cooking. Everything you need, in a microwave.

CONVECTION COOKING

Bringing together a ring element and a fan to provide evenly cooked and browned results. It’s quicker than conventional cooking and can be combined with the microwave to reduce cooking time even more, the grill for perfect browning or both the microwave and grill together.

TURBO GRILL

The fan cooking system and grill deliver perfect results in all kinds of meals. It even locks in meat juices for better flavour.

Coffee Machines

Combining the subtle art of the barista with the very
latest in coffee machine technology.
Caple gives you perfect coffee at the touch of a button.

COOKING

48

49

COFFEE MACHINES

BARISTA STYLE COFFEE

If you like milk with your coffee, you'll also need to polish up your frothing skills. The texture depends on how the air enters the milk as you steam. You need a smooth, consistent texture where the foam and milk intertwine. Look out for blobs of froth on top, and don't boil it. If the jug's base is too hot to touch, it means the milk's probably reached the right temperature.

For barista style lattes, cappuccinos and flat whites at the touch of a button.

THE SECRET TO GREAT COFFEE

Fantastic coffee depends on many factors. The beans you use, the way they're ground, even what temperature it is and how it is frothed. Plus, of course, finding a coffee machine that's really up to the job.

CHOOSING THE RIGHT COFFEE

Coffee beans vary in their size, shape, colour and flavour depending on the region and conditions in which they were grown. The range of unique flavours and aromas between regions is as expansive as the variety of wine available from different vineyards. It is worth experimenting with different varieties to discover a bean perfect for your palate.

Team that with one of our outstanding coffee machines and you'll have the perfect coffee every time.

MAKING A PERFECT ESPRESSO

What you're aiming for is a pour that starts out darkly coloured then turns into shades of caramel moving slowly, like honey. Caple coffee machines makes it effortless every time.

Features

CAPPUCCINO, JUST THE WAY YOU LIKE IT

Using the milk dispenser you can make your perfect flat white, latte or cappuccino. For ease of use the coffee machine is set to deliver a standard cappuccino, although if you prefer more or less coffee you can adjust either to suit your preference.

COFFEE FOR TWO

Save time by making two cups of coffee simultaneously.

COMPLETE CONTROL

Produce your ideal beverage with ease by adjusting the settings to your preference. You can control everything from the size and strength to the fineness of your coffee grind. Perfection every time.

S **C** Look out for products marked with a Sense or Classic flag to easily identify the ranges.

Warming & Storage Drawers

There's nothing more disappointing than a hot meal served on a cool plate. Caple's warming drawers keep tableware at just the right temperature for when the food is ready to be served.

Why not add a storage drawer too?
It's a convenient and stylish way to organise your coffee and wine accessories.

Hobs

Whether you choose gas, electric or induction, Caple's advanced technology and unswerving eye for detail means real control and stylish good looks every time.

COOKING

58

59

HOB

Choosing The Right Hob

MIX AND MATCH MODULAR HOBS

Any number of modules can be mixed together in any sequence. In fact, the options are almost endless [find out more on p.83].

INDUCTION

Uses leading-edge technology by creating a magnetic field between the hob and pan. They're quick, easy to use and energy efficient, vastly becoming a popular choice for professional chefs. [Find out more on p.62].

GAS

Heat is instant and the control is intuitive. You can choose either stainless steel or glass finishes. [Find out more on p.72].

Developed with cutting-edge design and outstanding efficiency in mind, DirectHeat+ sends the heat directly towards the base of the pan via 45° inclined flame. More heat hits the base of the pan rather than escaping around the sides, therefore decreasing boiling time and bringing food to temperature more rapidly.

ELECTRIC

The smooth glass finish of a ceramic hob makes cleaning easier. They're sleek and look very contemporary, making them ideal for more modern kitchens. [Find out more on p.69].

INDUCTION HOBS

They're hygienic, more energy-efficient,
safer and easy to use.

They work by creating a magnetic field between the hob and the pan. Heat is instant, and it's easy to control. Once you remove the pan, they cool down very quickly, which is handy if kids are about. They're more energy-efficient because they only heat the pan area itself, rather than all around it. In fact, they use around 25% less energy than some hobs.

MEMORY RECALL

After switching the hob off, it is possible to recall the last used settings with a couple of simple button presses.

AUTOMATIC PAN DETECTION

This feature detects when a suitable pan has been placed on a cooking zone, helping to eliminate the possibility of the hob being activated by a non-suitable object.

BOOSTER AND BOOSTER+

Saves time by increasing power for a quicker boiling time. Booster+ provides even further power and performance.

BRIDGE FUNCTION

Our C970i and C857i are multi zone induction hobs. They provide complete flexibility allowing the use of individual zones or the ability to combine them to create larger cooking areas.

If you cook regularly using oversized pans such as fish kettles, these hobs will handle them with ease.

ANTI-OVERFLOW, BOIL CONTROL AND ANTI-OVERHEAT

Some models include intuitive features to make cooking that little bit easier. Anti-overflow automatically cuts-off the cooking zone if liquid boils over onto the control panel.

Luckily boil control maintains a temperature of 94°C, just below boiling, whilst anti-overheat prevents the hob from overheating and damaging the elements, preserving the lifetime of your appliance.

PAUSE FUNCTION

This allows you to temporarily stop the entire hobs cooking activity and then restart it at the same settings.

- 2 Dia. 180mm – 2kW

INSTALLATION

- Diagram [p.227]
- Rated load 3kW
- Fuse rating 13A

PLEASE NOTE: The C840i induction hob achieves a 13A connection by restricting the maximum load to 3kW, this is done by cleverly limiting the combined zones to a maximum power level sum of 12. For example if you had boiling water on power level 6 on one zone you could cook rice on power level 4 and gently warm food on level 2 on a third zone.

SEE PAGES 62-63 FOR INDUCTION FEATURE EXPLAINED.

The Power of Electric Hobs

Caple’s electric hobs are engineered with performance, versatility and ease of use in mind.

Each hob has four separate zones offering different sizes, with individual lights that glow when activated. Touch control models set seamlessly into the worktop, but if you prefer more traditional operation opt for one of the dial control models.

The smooth black glass makes cleaning easy and thanks to minimalist styling our frameless ceramic models will fit into any type of kitchen.

Gas-on-Glass Hobs

If you're looking for a hob that combines contemporary design with power and functionality, this one ticks all the boxes.

That elegant glass surface doesn't just look stunning, it makes your hob simple to clean, while linked cast iron pan supports let you easily transfer pans across burners or away from the heat.

All burners are Flame Safe, so if a flame is extinguished for any reason, the gas supply is cut straight away. Some hobs also feature a responsive triple ring burner for extra powerful cooking.

TOUCH PRECISION CONTROLS

Touch controls set into black tempered glass look fabulous, but beauty is more than skin deep.

Advanced digital technology gives you nine precise power levels on each burner, so they also offer an exceptional level of control.

Developed with cutting-edge design and outstanding efficiency in mind, DirectHeat+ sends the heat directly towards the base of the pan via 45° inclined flame. More heat hits the base of the pan rather than escaping around the sides, therefore decreasing boiling time and bringing food to temperature more rapidly.

GUNMETAL HOB

At Caple, we know how important it is to co-ordinate colours in the kitchen, which is why the gunmetal trend continues with the C887G gas hob. The sleek black glass and cool gunmetal control work together in perfect harmony.

Flush Mounted Gas Hobs

The look says it all. Designed to fit perfectly with the clean and uncluttered lines of a modern kitchen, this innovative hob offers more than superb styling, it provides real practical advantages too.

CLEAN LINES

With their elegant low-profile recessed design and smart styling, these superb hobs maintain the clean linear look of your kitchen. They're thoroughly practical too - the hob's recess catches any spills and makes it easy to wipe down and clean.

Flush mounted or inset into your worktop, the recessed hob is the ideal match for solid surface worktop materials like marble, granite or slate. Flat cast iron supports mean that you can move pans across the hob effortlessly, and Caple's Flame Safe feature gives you peace of mind – if a flame goes out – the gas supply is cut almost immediately.

Developed with cutting-edge design and outstanding efficiency in mind, DirectHeat+ sends the heat directly towards the base of the pan via 45° inclined flame. More heat hits the base of the pan rather than escaping around the sides, therefore decreasing boiling time and bringing food to temperature more rapidly.

Low Profile Gas Hobs

Those who’ve cooked on gas rarely go back to any other hob. Gas rings provide immediate heat, and are intuitive, reliable, and super-easy to control.

Our gas hobs come in sleek stainless steel or smooth finishes, and look fantastic in contemporary or classic kitchens.

Unrivalled performance and looks, coupled with ease of fitting. Caple low profile hobs are designed to sit on top of the work surface with the smallest of edges.

They give you the appearance of a professional kitchen with added Caple refinement.

Modular Hobs

Now you can build the perfect hob for your needs.
Combine gas, electric, induction and modular extraction
for a truly bespoke solution that’s sure to impress.

Combine two, three, four or more modules, of any type and
in any sequence. Introduce induction cooking into your
kitchen by combining it with gas or electric, or wow with
tepan - perfect for flash frying.

When coupled with powerful downdraft extraction it
offers a clean, fully integrated design throughout –
bespoke and beautiful.

Induction Downdraft Extractors

SEAMLESS INTEGRATION, AND UNMISTAKABLE STYLING.

As the name suggests induction downdrafts combine intuitive induction hobs with the added benefit of integrated, powerful downdraft extraction.

SPACE SAVING INSTALLATION

Unique space-saving installation can be used with minimal ducting and the motor located behind the plinth which means you can still utilise the cabinets directly underneath the hob.

For installation see p. 230-231.

The DD940BK gives you the option to use Plasma technology allowing you to recirculate the air with very efficient odour removal process.

The powerful, ultra quiet motor draws the cooking vapour through the 12 stage filter, removing grease and moisture.

Discreetly positioned behind the plinth, the motor draws the air through the ducting, on towards the filters.

The first filter creates the 4th stage of matter, Plasma. A trusted technology developed by the German university of Göttingen. The Plasma removes 95% of the odours passing through it.

A carbon filter removes any remaining odours and has a life span of 5 years or more when used with a plasma filter.

Clean air is then recirculated back into the room.

GRILLE/DD935GM
Co-ordinate colours in the kitchen with a gunmetal grille.

Extraction

A well-engineered extractor hood does more than just help to capture odours from your kitchen. Be bold, and use it as a visual focal point too.

Choosing the Perfect Hood

We’ve designed one for every kind of kitchen. Striking colours, exceptional finishes, and plenty of functionality.

Extractors and hoods are designed to remove cooking odours, moisture and grease from the cooking environment. The extractor continually removes and filters the air when on. It then, either, returns the filtered air back in to the room or expels it through and external vent. The greater the extraction rate the more effectively this is done.

GETTING THE BEST FROM YOUR HOOD

Try switching on the extractor or hood 15 minutes before you begin cooking. This creates kinetic air circulation within the kitchen carrying the air out more effectively. It is also advisable to keep it running for a further 15 minutes after you have finished cooking.

You can sit down and enjoy the results of your culinary skills whilst your Caple extractor or hood gets on with its job.

Once you have chosen your extractor, it is important to pair it with the correct venting. It is essential the stated ducting diameter is used, we also recommend rigid ducting to ensure you get the maximum performance. Not only will this prolong the life of your extractor, it will also improve efficiency.

If you choose to vent your extractor to the outside world, look out for the venting symbol shown to assist you in choosing the correct product. Please see page 142-143 for more information.

INDUCTION DOWNDRAFT

This award-winning category of extraction is ideal for open plan living. The powerful extraction eradicates cooking odours from the room and the minimal aesthetics discreetly blends into the worktop for a seamless look. See our range of Induction downdraft hobs in the hob section, pages 86-89

CEILING HOODS

They’re unobtrusive and they save you space too. You can choose different motors and have complete control over extraction rates.

WALL CHIMNEY HOODS

Available in all kinds of sizes, styles and finishes. Great for a dramatic focal point.

INTEGRATED HOODS

Discretely hidden behind kitchen furniture, and pulled out when needed.

DOWNDRAFT EXTRACTORS

This type of counter extractor is installed behind or alongside your hob. When you need it, just press the button and it glides up in to position.

ISLAND HOODS

Better suited to larger kitchens. You can suspend them over a central island unit to make a stunning focal point.

BUILT-UNDER HOODS

Ideal for smaller kitchens. They’re cleverly integrated into the underside of kitchen units.

CONVENTIONAL HOODS

This type fits neatly beneath a kitchen unit, with controls usually found on the front.

Downdraft Extractors

Caple downdraft extractors are the epitome of intelligent thinking in kitchen design. With an ingenious under-counter installation, wall space is kept clear and when integrated into an island unit, views across the kitchen remain uncluttered.

A downdraft extractor can be housed either behind or alongside a hob, in an island unit or within a base against a wall.

FLUSH FITTING

Fitting elegantly into the surface until activated, it rises out of the worktop beyond the height of the pans to extract odours directly from the cooking area.

These smart extractors deliver high extraction rates and give you a choice of motors and motor positioning options to suit your kitchen design. For example, your motor could be situated under the floor, on an external wall or in a cupboard, so noise can be virtually eliminated [p.108-113]. With real versatility, our downdraft extractors can expel air via ducting or recirculate it using charcoal filters.

SLEEK STYLING

Most of our downdrafts feature touch control technology and are designed to complement the appliances within the Sense range.

SMOOTH OPERATOR

At the touch of a button, the DD925CO rises smoothly up from its flush, retracted position.

MOTOR CHOICES

Downdraft extractors will need to be purchased with a motor. For the full range please see p.108-109

INVISIBLE MOTOR

The DDMEXT28 is designed to be easily and discreetly installed behind the plinth without the requirement of ducting to the outside of the building. For more details see p.109.

Ceiling Hoods

Style is nothing without functionality.
Naturally, Caple’s ceiling extractors come with
both, as standard.

They’re available in various sizes and engineered to
achieve the very highest extraction rates. There’s also a
choice of motors, which can be positioned in a range of
locations to reduce noise and free-up space.

Every Caple ceiling extractor uses our perimetric extraction system, which draws air in through narrow apertures around the full perimeter of the pan. It means higher air pressure, greater efficiency and less noise.

CREATING THE RIGHT ATMOSPHERE

You can also select just the right kind of lighting you want for your kitchen - from bright white to a soft, cosy, glow.

CONTROL AT YOUR FINGERTIPS

Our user-friendly remote control places power and lighting functions within easy reach. It also allows you to set the handy timer function, which automatically switches off the extractor after 10 minutes. When you leave your kitchen you know that any odours will be gone by the time you return.

CENTRE STAGE

We love the challenge of making functionality look stunning. Our hoods represent the epitome of contemporary design and technology.

Perfectly complementing any other Caple product, our ceiling hoods provide performance and styling like no other.

LED strip lighting, white glass finish and intelligent features ensure it has a place not only as a talking point in your kitchen, but an invaluable and practical addition.

MOTOR CHOICES

Some models have unique built-in motors, others will need to be purchased with a motor. To get the right power for you see our full range of motors on p.108 - 109.

MOTOR PERFORMANCE

Island Hoods

High quality, highly efficient and intuitive our range of island hoods offer every kind of style to suit your kitchen.

COMPLETE CONTROL

Power and lighting adjustments at your fingertips with our user-friendly remote control. The handy timer function automatically switches off the extractor after 10 minutes, so you can leave your kitchen knowing any odours will have disappeared when you return - just some of the features from our fabulous island hood range.

CERAMICA

The Ceramica island hood with its incredibly eyecatching handmade ceramic body, features powerful extraction and exquisite attention to detail.

ELEGANT EFFICIENCY

The Motus hood glides into action with touch control operation and an electric blue display.

STAGE 1

The whisper quiet perimetric extraction system removes even the subtlest odours.

STAGE 2

The black glass front rises further to reveal the aluminium filters as the extraction level increases.

STAGE 3

It glides effortlessly into position to remove even those hard to shift cooking odours.

STAGE 4

Maximum extraction when you need it most. Still operating below an impressive 62dB[A].

OMNIS

The ultra-modern, sleek black glass and slanted edges is ideal if you want to create a minimal and stylish look.

HIGH EFFICIENCY VENTING

125MM ELBOW BEND
[CODE 550GL]

- Suitable for 125mm flat channel ducting [204 x 60mm] Can be used with C227W and 515W

150MM ELBOW BEND
[CODE C950GL]

- Suitable for 150mm flat channel ducting [220 x 90mm] Can be used with C2653WGL, C2655WGL and 915W

150MM VENTING KIT
[CODE C2653WGL]

- For hoods with extraction over 500m³/h
- 3 metre venting kit

150MM VENTING KIT
[CODE C2655WGL]

- Suitable for use with downdraft hoods
- 3 metre rigid venting kit

Due to the profile of a duct bend, air travelling through it can become turbulent causing increased resistance and noise. As a consequence the cooker hood will need to work harder in order to meet the required airflow rates, therefore consuming more energy. This high efficiency 90° bend has been designed to allow a uniform flow of air through the section of ducting, reducing the resistance by up to 60% and lowering the air speed. All of which results in a quieter and more efficient system.

- Smoothly channels air through the duct bend in a uniform flow
- Reduced duct resistance by up to 60% to lower the systems pressure drop and overall energy usage
- Reduced air speed through the bend to reduce noise
- Performance has been tested by the Building Research Establishment [BRE]

The diagram illustrates the improvement of air flow when using 550GL or C950GL ducting

Typical airflow through a standard bend

Typical airflow through a high efficiency 90° horizontal bend

[CODE C202-6W]

1 Metre flexible venting kit

CHOOSING THE RIGHT VENTING

To ensure you have the correct venting for your chosen hood, please refer to the hood specification where the required diameter kit is listed.

EXTERNAL MOTORS

Due to the power and fitment of Caple external motors [DDMEXT11, DDMEXT21, DDMEXT25, DDMEXT28, DDMEXT30 and DDMEXT40, see p.108 - 109] you must use rigid ducting.

COOLING VENTING

When installing integrated refrigeration it is important to use the correct venting.

Features

SAFE & EASY TO INSTALL

All Caple glass splashbacks are adhesive-backed. This stops them shattering and allows fitting to any clean, non-porous surface. All our glass products meet British Safety Standards and are made from toughened glass.

Refrigeration

Chill it, freeze it, love it.

Whether you want a discreet space-saving under-counter fridge or something more spacious, you'll find it right here.

COOLING

150

151

REFRIGERATION

Whatever you want, that's cool.

We've one for every kind of kitchen, big or small.
Different colours, different finishes, different sizes
and plenty of functionality.

PROFESSIONAL

The CAFF60 has a massive 820L capacity in six compartments, as well as three separate temperature zones - one freezer and two fridge zones. Each of which can be set to a different temperature. It can be built-in or used as a freestanding appliance.

FRENCH DOOR

This large, freestanding fridge freezer has two doors on the top for the fridge and drawers underneath for the freezer, great for storing large items.

SIDE-BY-SIDE

Big on looks and big on capacity. Available in black or stainless steel some side-by-side fridge freezers can also be plumbed in for a constant supply of cold filtered water and ice.

70/30 FREESTANDING

This is the perfect option when space is key. This stacked refrigeration solution allows you to keep that extra floor space with the impressive styling of freestanding refrigeration.

INTEGRATED

Our fridge freezer combinations or compact under-counter and in-column products can be hidden behind furniture doors. Choose fridges and freezers in different sizes and combinations depending on the space available and where you want to put them in your kitchen.

Professional Cooling Centre

Made from stainless steel both inside and out, the CAFF60 can be installed built-in or used as a freestanding fridge freezer with the addition of a pair of optional side panels [PANCAFF60].

INSTALLATION

- Diagram [p.240]

FEATURE RICH DESIGN

An argon filled triple glazed fridge compartment door allows you to see instantly what is in the fridge, which is further enhanced by subtle interior lights and illuminated shelf supports.

Supersized, super efficient and super stylish, the CAFF60, if your lucky enough to have the space in your kitchen, has everything you'd ever want in a large modern fridge freezer.

FREEZER AND FRIDGE ZONES

The CAFF60 has three separate temperature zones; one freezer and two fridge zones. The fridge zones are split into two. One behind the glazed door and the other one made up of the two fridge drawers directly below. All three zones can have different temperatures depending on your preference. The top fridge drawer also houses a veg-fresh compartment which is used to keep vegetables fresh for longer.

ELECTRONIC TOUCH CONTROLS

Each of the temperature zones can be controlled using the electronic touch control digital display. Other functions including date, time and a Sabbath mode can be easily accessed from this display panel too.

AUTOMATIC ICE MAKER

Convenience and capacity are very important when a fridge freezer like the CAFF60 is considered. Having a massive 820 litre total net capacity and the convenience of a filtered water ice maker, easily meets both requirements.

LED SHELF LIGHTING

Each shelf is enhanced by LED lighting acting as the shelf support. Not only does it give a dramatic look, it also ensures you can see exactly what your looking for.

PANCAFF60 SIDE PANEL

Freestanding Refrigeration

Convenience, additional storage and ease of use are the benefits of a French door fridge freezer compared to other types of refrigeration.

DOUBLE UP

Two freezer drawers gives you easy access to your food and with the capacity of 167L, the CAFF41 can freeze all your tasty treats until you need them.

FULL ILLUMINTION

The stylish backlight takes centre stage illuminating the entire fridge from top to bottom ensuring you can see all your fridge's contents quickly and easily.

STEEL TRIMMED INTERIOR

Glass shelves with deluxe steel trims to catch any spills.

INTERNAL LED LIGHTING AND TOUCH CONTROLS

Bold, well positioned LED lighting illuminate the interior of the fridge for excellent visibility while the touch controls provide quick access to all the handy functions.

WATER FILTERS

Fresh, great tasting filtered water supplied at the touch of a button. It improves the taste and odour by reducing chlorine, heavy metals and other sediments found in your tap water supply. It is located at the rear of the fridge compartment to allow easy access and it is quick to change with its simple, twist fit installation.

STYLISH VERSATILITY

The CAFF45GM features smart LED touch controls, cool gunmetal trim interior and four large capacity compartments, one of which can be used as a fridge or a freezer – the perfect combination of style and substance.

Features

ICE AND WATER?

Choose between crushed or cubed ice. Chilled, filtered water is also available at the touch of a button on our CAFF207 models that can be plumbed directly in to your kitchen.

Features

FRESH AIR FLOW TECHNOLOGY

The fan positioned at the top of the fridge circulates the cool air for even distribution keeping your food at the perfect temperature. Help preserve fresh foods for longer by adjusting the humidity in the crisper compartments.

Integrated Refrigeration

Choose from tall column fridge or freezer combinations or compact under-counter models. How about an entirely separate fridge and freezer located in different spots around the kitchen? There are also tall all-in-one models that fit neatly into a single space.

Whatever you decide, it's reassuring to know that all of Caple's integrated refrigeration appliances have an A++ or A+ energy rating

- 230 Litre net fridge capacity

INSTALLATION

- Diagram [p.243]

* The door is supplied RH hinged, it can be reversed. Please consult a qualified installation expert to reverse door configuration.

FROST-FREE

No more laborious defrosting with a scraper. Our frost-free system works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer. Freezing food is also much quicker, preserving as many nutrients as possible and freeing up much needed storage space.

FULLY ADJUSTABLE SHELF

Key features in the A++ rated RiL1795 fridge include a fully adjustable shelf in the door for true flexibility in your cooling appliance.

MODERN LIVING

The RiL1795 fridge and RiF1795 freezer have been designed with modern living in mind. The matching, in-column fridge and freezer are hidden behind your cabinet doors for an ultra neat finish in a contemporary or classic kitchen.

ENHANCED LIGHTING

LED strip lighting across the top and down each side of the fridge for a stylish, practical finish.

GLASS SHELVES

Some of which have a deluxe steel trims to catch any spills.

Features

THE FRESHEST FOOD

Caple Fresh technology eliminates ethylene gas [a by-product of fresh foods] inside the vegetable drawer, therefore enabling your fresh food to last for longer. Caple's cool airflow system also ensures cold air will flow to every level for even chilling.

FROST-FREE

No more laborious defrosting with a scraper. Our frost-free system works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer. Freezing food is also much quicker, preserving as many nutrients as possible and freeing up much needed storage space.

LED LIGHTING & ELECTRONIC CONTROLS

Strip LED lighting adds a modern feel, while electronic controls are precise and easy to use.

Features

FRUIT & VEGETABLE PRESERVATION

The new Caple Fresh preservation technology inside the crisper drawer, ensures that your fruit and vegetables stay fresher and tastier for longer.

This innovative new system helps to eliminate the natural gases that are produced during the ripening and ageing process, preserving them for longer.

Also, the Caple Fresh preserver does not need to be replaced. It can be regenerated by exposing it to sunlight for one day a year.

INSTALLATION

- Diagram [p.244]

Features

FROST-FREE

No more laborious defrosting with a scraper. Our frost-free system works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer. Freezing food is also much quicker, preserving as many nutrients as possible and freeing up much needed storage space.

LED LIGHTING & ELECTRONIC CONTROLS

Strip LED lighting adds a modern feel, while electronic controls are precise and easy to use.

TWIST ICE CUBE MAKER

The new twist ice cube maker is a convenient way to make ice, with the added benefits of easy removal for cleaning for those times when you need the extra space.

Wine Cabinets

Caple's wine cabinets create the optimum storage conditions for your wine; the correct temperature, humidity and air circulation. They even use low vibration technology to minimise disturbance.

And of course, they look great.

CARE FOR YOUR COLLECTION

TO STORE

All wine should be stored at 12-14°C whether red or white. Our cabinets simulate cellar conditions - dark, still, humid and a constant temperature.

TO SERVE

For rosés and whites it's 8-14°C, for sparkling wines it's 6-10°C. Full reds need 16-18°C, whereas lighter ones are best at 13-16°C. For some wine cabinets this temperature variation is a problem. However, Caple cabinets can offer multiple zones that keep all your wines at the perfect temperature for storing or better still, serving.

COMPRESSOR COOLING

When choosing a wine cabinet it's important to consider the type of cooling system it uses. Many conventional cabinets use thermo electric technology, which is only capable of cooling to 15°C below the room's ambient temperature. So on a warm day of 25°C the contents will only cool to a minimum of 10°C, leaving your wine exposed to potentially damaging temperatures.

Caple's wine cabinets use a compressor cooling system, which maintains precisely the right temperature, regardless of the ambient room temperature.

FINER WINE

Vibration and humidity during storage will influence how your wine will taste when it's finally poured. That's why Caple's wine cabinets come with anti-vibration gaskets and low vibration compressors to prevent disturbance to the wine's sediment balance. Our cabinets also create an ideal atmosphere of above 65% humidity, to preserve cork quality and prevent mould and odours. You can be confident your wine is in good hands.

THE IMPORTANCE OF LIGHTING AND STACKING

Ultraviolet light causes lightstrike, which makes wine age prematurely. So it's important to avoid exposing bottles to sunlight or fluorescent light. Our white LEDs not only look great, they are also UV-free with no heat output either.

Bottles should usually be stored on their side so the wine stays in contact with the cork. This keeps the cork moist and ensures a good air seal for the bottle, which prevents oxidation and immediate ageing.

Wine benefits best from side storage if the level of the wine reaches at least the upper shoulder of the bottle when upright. Caple's wine cabinets provide sufficient shelves to allow for bottles to be stored either on a single level for easy reach, or stacked for longer storage.

SENSE PREMIUM WINE CABINETS

TELESCOPIC SHELVES

The beech and stainless fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection. Perfect for Burgundy, Bordeaux and Champagne bottles.

AIR PURIFYING TECHNOLOGY

Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

PREMIUM FUNCTIONALITY

Four light settings and four functions means you can find the right storage environment to suit your wine.

ON/OFF

Internal light is continuously on. Three minutes after closing the door the light will dim for a more subtle look.

DOOR OPENING LIGHT

Internal light will switch on when the door is opened, and off when the door is closed.

TIMER

This function keeps the lights on for 10 minutes once the door is closed and then switches off.

BRIGHTNESS

Once a light function is selected you can adjust the brightness of the internal lighting.

NORMAL MODE

The wine cabinet will operate with the temperatures you select.

ECO MODE

Lighting and control panel turns off and the compressor is delayed. Perfect for saving energy.

INTELLIGENT MODE

The fan speed adjusts according to the ambient temperature so the cabinet doesn't have to work as hard and also saves energy.

DEMO MODE

Primarily for Retail use. In this mode the compressor and heater are disabled and the fan input is reduced.

The Wi6160 undercounter integrated wine cabinet is the only one of its kind in Europe. Simply make a frame for the cabinet to match your kitchen furniture to create a seamlessly discreet and truly unique, luxurious style.

Features

TELESCOPIC SHELVES

The beech and stainless fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection. Perfect for Burgundy, Bordeaux and Champagne bottles.

CHARCOAL FILTERS

Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

PREMIUM FUNCTIONALITY

Four light settings and four functions including Eco means you can find the right storage environment to suit your wine.

SENSE & CLASSIC

WINE CABINETS

FILLER PANELS & PLINTHS

If you have a reduced plinth height you can use a filler panel made from the same material as the wine cabinet [stainless steel or black], to create a seamless look with no gap.

A full plinth or recessed plinth grille option is available for our undercounter wine cabinets. They neatly cover the ventilation hole in the plinth and blend in with your kitchen décor.

DUAL ZONE

Dual zone wine cabinets allow you to store your collection at the perfect temperature for storing and drinking.

CHAMPAGNE SHELVES

The easy-slide beech shelves are non-scratch so they won't damage bottle labels. If Champagne is your drink of choice, the slatted design allows you to store larger bottles so you're prepared for any special occasion.

GLASS SHELVES

The glass shelves allows you to convert some of your wine cabinet into storage for canned drinks.

GENERAL FEATURES

- Shelves can accommodate 750ml Bordeaux, Burgundy and Champagne bottles
- No-frost compressor cooling technology maintains a consistent temperature
- Single temperature zone stores red, white or sparkling wine
- Touch controls and white LED display
- Converts into a can chiller using optional glass shelving
- UV/heat-free white LED lighting [switchable]
- Vibration free
- Adjustable height to fit 100-150mm plinth
- Stainless steel handle
- Beech shelves
- Fan circulated cool air for even temperature distribution
- Reversible door
- 5 Sliding shelves and 1 base shelf
- 100% CFC/HFC free
- Toughened UV protected glass door
- Humidity control water tank
- Black cabinet interior and exterior
- Recessed for fitting furniture plinth

WI3124 UNIQUE FEATURES

- Black glass door with gloss black door frame
- Supplied with stainless steel universal plinth grille w:230mm

WI3123 UNIQUE FEATURES

Taking the chore out of washing

Who says that functional objects can't look fantastic?
That's why we've designed our dishwasher and laundry
appliances with an eagle eye on performance and style

Caple is renowned for ultra stylish looks, hi-tech and all-round ease
of use. With fast, efficient clothes washing and drying and sparkling
clean dishes, our appliances will always get the job done beautifully
with minimal effort.

WASH HOWEVER YOU WISH

Our range of washing appliances gives you all the options you
need to fit in with your kitchen and your budget. What's on
your wish list? An appliance that makes the most of minimal
space? One that can cope with a large family? Or super
stylish looks? We tick all your boxes.

Our dishwashers are exceptionally versatile, using clever
technology to deal with any type of load. Our washing
machines and washer dryers make light work of all your
laundry needs with features like allergy care, stain reduction
and extra large doors. What's more, Caple tumble dryers can
be kept neatly behind furniture doors for a flawless finish.

Dishwashers

Our machines don't just leave your dishes sparkling, they also come with at least an A+ rating for energy and A for wash and drying performance.

202
203

DISHWASHERS

PERFORMANCE WITH SHINE

Whether it's a quick wash or something more heavy-duty, every Caple dishwasher is designed to perform well. All models are fully integrated to tuck away behind your kitchen doors and are at least A+ energy rated, with the top of the range model now an amazing A+++.

WATER CONSUMPTION

The entire range has low water consumption figures, which is not only great for the environment but your pocket also. The Auto Wash programme on the Di491 uses an astonishingly low 8 litres of water.

POWER WASH AND AUTO WASH

Exclusive to the Di651. Power Wash, when used with either intensive, normal, economy, glass and one hour express programmes, helps break through heavily soiled loads by increasing washing temperature and duration.

Auto wash on Di651 and Di491 have sensors checking the level of cleanliness of the load, saving you time, energy and water.

ADJUSTABLE UPPER BASKET

Look out for models with adjustable upper basket. You can change the height of the upper basket [even with full loads] with the simple release of two conveniently placed levers.

ALTERNATIVE WASH

Available on a selection of models the alternative wash allows you to select either the upper or lower baskets for the load. You'll save water and energy with smaller loads.

INTERNAL LED LIGHT

Activated when the door is opened, it illuminates the inside.

DELAY TIMER

Allows you to delay the start time for between 1-24 hours.

REDUCE YOUR WATER AND ENERGY USAGE

The Half Load function on our models is ideally suited to small loads, unlike traditional Half Load programmes [which usually only use one basket] reducing energy and water use.

AQUASTOP

Automatically cuts off the water at the first sign of a leak, helping to avoid costly water damage.

Features

FLEXIBLE CUTLERY TRAY

Why not opt for an adjustable cutlery tray. The tray sits at the top of the dishwasher freeing up more space in the lower basket. On the

600mm models you can choose from five set-up options, [shown below] depending on what is in the basket below.

WASHER DRYER

Our integrated washer dryer offers multiple programmes that are easy to operate, meeting all your laundry needs with minimal fuss.

ELECTRONIC CONTROLS

Simple controls mean you can change between options at the click of a button.

DOOR SAFETY LOCK

Our machine operates at high temperatures during mid-cycle. The door will remain locked until the clothes cool 53°C.

STAIN REDUCTION

Uses advanced technology to maximise cleaning action, keeping your whites looking fresher for longer.

TUMBLE DRYERS

We want your lives to be easier. Caple’s intelligent tumble dryers make sure you always have a pile of soft, freshly-laundered garments ready when you need them.

There are six levels of dryness, so you can choose finishes ranging from ready-to-wear and easy-to-iron. With generous 6kg or 7kg capacities, these are essential machines for busy families.

Our fully integrated tumble dryers offer two heat settings and a venting system for the best possible performance. The TDi111 also has sensors in the drum that constantly check moisture levels, so the machine only stops when clothes are completely dry. Other handy features include a reverse tumble action and an easy-access fluff filter.

FULLY INTEGRATED SENSOR VENTED TUMBLE DRYER

PLINTH HEATERS

PRODUCT CODE

PH500H

DIMENSIONS

- Grille: 495 x 100mm
- Heater: 320 x 400mm [including pipe work]
- Plinth cut out: 360 x 96mm

FUNCTIONS

- 500mm hydronic plinth heater [central heating]
- Stainless steel grille
- 2 speed fan
- Summer setting [fan circulates air round the room]
- Up to 24% more efficient than standard radiators
- Auto switch on
- Easy install
- Low noise

CONNECTIONS

- Fuse rating: 3amp
- Voltage: 220-240 / 50hz
- Heat output: 3057 - 3979 Btu [0.9 - 1.17kW]
- Maximum working pressure: 8bar [1Mpa]

OPTIONAL EXTRAS

- White plinth grille available [PHHGRILL/WH]
- Visit caple.co.uk for full range

PRODUCT CODE

PH501E

DIMENSIONS

- Grille: 495 x 100mm
- Heater: 320 x 200mm
- Plinth cut out: 360 x 96mm

FUNCTIONS

- 500mm electric plinth heater
- Stainless steel grille
- 2 speed fan
- Easy install
- Low noise

FEATURES

- Wall thermostat included

CONNECTIONS

- Fuse rating: 10amp
- Voltage: 220-240 / 50hz
- Heat output: 940 -1990w

OPTIONAL EXTRAS

- White plinth grille available [PHHGRILL/WH]
- Visit caple.co.uk for full range

Features

WHITE GRILLES

Optional extra plinth grille finished in white.

FOOD WASTE DISPOSAL

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It’s clean, it’s green and it leaves less to clutter up your bin. It also reduces any decomposing food odours.

It couldn’t be easier or more convenient to use. Simply turn on the cold tap and the disposer then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means much less rubbish to take away and clog up our landfill sites. It also means a reduction in the amount of greenhouse gases emitted. Waste from your disposer can actually be recycled into a soil conditioner once it reaches the water treatment plant, so you will be making a positive contribution to your environment.

FOOD WASTE DISPOSAL UNITS

PRODUCT CODE

WDU050

DIMENSIONS

W:175mm
D:175mm
H:372mm

FEATURES

- 0.5hp waste disposal unit
- Continuous feed
- High speed magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Easy mount installation
- Sound insulation
- 2 Year guarantee
- Suitable for air switch [WDUAIR - see opposite]

OPTIONAL EXTRAS

- Air switch [WDUAIR] for WDU050 only
- Basket strainer waste decorative cover [CWC2] Visit cable.co.uk for full range

PRODUCT CODE

WDU075

DIMENSIONS

W:216mm
D:216mm
H:400mm

FEATURES

- 0.75hp waste disposal unit
- Continuous feed
- High speed magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Easy mount installation
- Sound insulation
- 2 Year guarantee
- Air switch [WDUAIR] included

OPTIONAL EXTRAS

- Basket strainer waste decorative cover [CWC2] Visit cable.co.uk for full range

PRODUCT CODE

WDU100

DIMENSIONS

W:216mm
D:216mm
H:437mm

FEATURES

- 1.0hp waste disposal unit
- Continuous feed
- High speed magnet motor
- Overload protection
- Corrosion resistant 3 stage grinding system
- Easy mount installation
- Sound insulation
- 3 Year guarantee
- Air switch [WDUAIR] included

OPTIONAL EXTRAS

- Basket strainer waste decorative cover [CWC2] Visit cable.co.uk for full range

Features

WDUAIR

The chrome air switch is an optional extra with the WDU050 and comes as standard with the WDU075 and WDU100.

DOWNDRAFT EXTRACTORS

Cut-out: 855mm x 115mm

INSTALLATION MADE EASY

Minimum cabinet depth depends on orientation, hob type and worktop material. Cabinet base may need to be cut or routed to accommodate height of unit. If positioned behind a hob, minimum cabinet width for DD522/606 extractors is 600mm, for DD903/911/901 allow 900mm and for DD120BK 1200mm is required. If positioned alongside a hob, the cabinet may need to be reinforced to strengthen where the base has been modified. The hood can be fitted right up to an electric hob [50mm gap required for gas hobs], but always ensure that the independent electronics box in the cupboard below is installed at least 650mm from the heat source. The hood can be ducted from both sides enabling the downdraft to be positioned behind a hob and under-counter oven.

PERFORMANCE GUARANTEED

Here at Caple, performance and reliability are the most important features considered when designing and manufacturing our products. With that in mind, we have developed Caple Care, an after-care solution comprising of three tiers to give you that extra peace of mind.

See page 250 for more extended guarantee information.

FREE 2 YEAR GUARANTEE

Across all Caple appliances we offer a free 2 year guarantee on parts and labour. When selecting the components to design your perfect kitchen it is important you have the right assurance without spending an extra penny. All you need to do is visit our website or call us on 0330 123 0998 to register your free 2 year guarantee.

5 YEAR EXTENDED COVER

Why not extend your cover to 5 years? Caple Care 5 years parts and labour cover means for a one off payment or a monthly fee you can protect your appliance for a total of 5 years [including your free 2 year guarantee] on all parts and labour for any of your Caple appliances. Please visit our website for further details or see page 258.

OUT OF GUARANTEE

If you choose not to opt for a 5 year extended warranty, don't worry. Here at Caple we offer out of guarantee cover. So, if you are not covered under our extended warranty, for a fixed fee, we can still arrange a service call [including parts and labour] or a replacement product up to 6 years after the purchase date. Terms and conditions apply.

TO REGISTER YOUR FREE 2 YEAR GUARANTEE OR DISCUSS AN EXTENDED WARRANTY, CALL
0330 123 0998 OR VISIT CAPLE.CO.UK/REGISTER-YOUR-APPLIANCE

Lines are open 9am - 5pm Monday to Friday [excluding bank holidays].
Calls maybe recorded and monitored for quality and training purposes.
Full Terms and Conditions can be found at www.caple.co.uk.

CAPLE CARE

All Caple appliances come with a 2 year parts and labour guarantee.
You can extend this to provide a full 5 years parts and labour warranty.

THE BENEFITS OF TAKING OUT AN EXTENDED WARRANTY

The Caple protection plan has been carefully put together so customers who take out the extended cover benefit from:

5

Up to 5 years parts and labour warranty against breakdown

A nationwide network of Caple approved engineers to undertake repairs in the home

£

Spread the cost over 10 months with our monthly payment plan visit www.worldpay.com for full T&Cs

A replacement appliance should the repair of the original be uneconomic or impossible

Access to the Caple UK based contact centre

To register your free 2 year guarantee or discuss an extended warranty, call

0330 123 0998

Calls are charged at the local rate— please check with your provider for actual charges.
