Worktops

Bringing
style to
the surface

carella.com

Creating surfaces for everyday use

For 25 years, Carella has been designing and manufacturing beautiful worktops.

People's tastes are continually changing, and we have seen many innovations in kitchen design over the years. Your choice from Carella's product range is now better than ever.

We have carried out many years of research to identify the best materials and production processes for our range of worktops, breakfast bars, upstands and splashbacks.

A beautifully designed laminated worktop is a modern choice.

They are affordable, hygienic and easy to maintain and are available in many finishes, textures and styles. Our worktops are all made to stringent European standards and UK regulations.

Whichever Carella worktop you choose, they all have one thing in common – they are built to withstand whatever life throws at them – truly "made for life".

Now you can get the look and feel of solid wood or stone, without the expense, that will always be easy to live with and low maintenance.

We insist on continuous investment in our business at our state-of-the-art factory, with an emphasis on the latest production machinery and methods, and the continuous training and development of our staff.

Identifying the newest trends throughout Europe, through our network of suppliers, ensures we can offer the best to our customers.

Our efficiency, innovation and attention to detail has been rewarded with various industry standards, including ISO 9001 & ISO 14001.

Carella is also a member of FIRA. We take our environmental responsibilities seriously and are committed to energy recovery.

This means we are always open to new ways to minimise our carbon footprint. Where possible we source renewable raw materials, always from like-minded, responsible suppliers.

Attention to Detail

Waste-2-Energy

Carella Accreditations

Bringing style to the surface

All of our styles, colours and finishes are also available as upstands and splashbacks. See pages 24 and 26 for more information.

1

Choosing a Size...

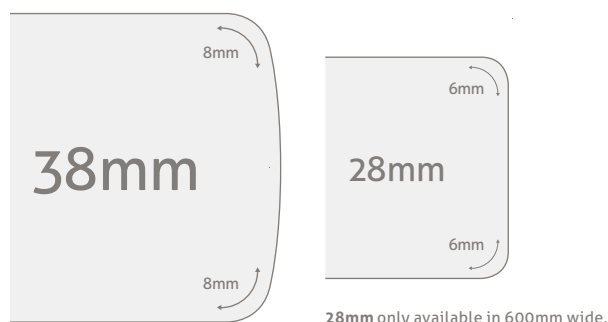

Our standard worktops are available in 3.6m and 4.1m lengths. The available length and width of each worktop can differ with each individual style, colour or finish. See each worktop opposite carefully for availability.

✓	900mm	✓
✓	670mm	✓
✓	600mm	✓
3.6m		4.1m

2

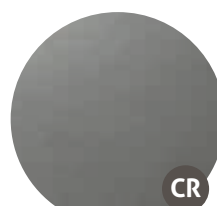

Choosing a Profile...

There are two thicknesses available, each with a different profile. 38mm has a slightly rounded profile and 28mm has a straight profile. The thickness of the worktop is dependent on the size chosen in stage 1.

3

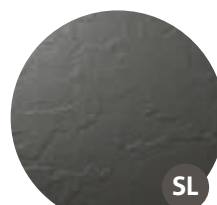

Choosing a Finish/Texture...
